

About the school

Our 3DESIGN team met Lily Young and Frankie Choi from SÈVE STUDIO Jewellery during the Hong Kong Jewellery show. SÈVE STUDIO is a private institute for jewellery and a training centre since 2002 located in the heart of Hong Kong. Lily is the marketing manager of the company and Frankie Choi is the creative director. Both have over 15 years experience of the jewellery market.

In terms of Research & Development, Frankie develops his own machines and has been awarded a creative prize during a contest a few years ago. His last creation is a 6-axis machine which is used in their training centre.

SÈVE STUDIO offers courses for different software solutions, but after discovering 3DESIGN, the owners simply had to teach and train students upon it. SÈVE STUDIO trains both students from universities and professionals who already work for jewellery companies (designers, managers...) who want to adapt themselves to new technologies.

At SÈVE STUDIO, students can both work on new technologies or learn manual and traditional methods. The centre provides tools to complete the entire process: from the design (using 3DESIGN) to the prototype with Frankie's 6-axis machine, the setting and finally the polishing step.

3DESIGN courses started in October 2006 at SÈVE STUDIO. 30-hour courses and 60-hour courses (for university students) are both offered. The centre is, indeed, entirely decorated with 3DESIGN posters and renderings. The environment is really nice and appropriately set for serious yet friendly learning.

To offer such a program, 3 employees from SÈVE STUDIO have been trained by Thomas, a sales engineer from Fables Applied Technology, our official reseller.

Because Lily and Frankie have been so enthusiastic about 3DESIGN, they have already trained true references in the industry. To name just a few, SÈVE STUDIO has already worked with CTU, the Hong Kong University and the jewellery association.

About the course

3DESIGN CAD is the most appropriate software for 3D real-time jewelry and graphic object creation. It allows users to create and produce unique pieces and collections in a matter of days thanks to a pleasant and intuitive interface.

Because 3DESIGN CAD is dedicated to jewelers, it is a multi-platform tool developed for PC, Mac and Linux.

The realistic pre-visualization of the 3D object facilitates designers' work. 3DESIGN CAD is the perfect fit for professional jewelers as it combines an impressive Part module along with a powerful Sketch module. It encompasses all the assets and flexibility professionals need
