

## About the school

**Truro College** was established as a new Tertiary College in 1993, near the city of Truro in the county of Cornwall in the far South West of the United Kingdom.

The College offers a wide range of academic and vocational courses to learners, mostly aged 16-18, studying on courses from Level 3 to AS and A level courses.

Truro College was recently awarded the title of "College of the Year" in the Business Enterprise Awards. The reputation of the College in recent years has been such that it is seen as one of the leading colleges in the whole of the United Kingdom.

Unique to Cornwall, this Silversmithing & Jewellery course is aimed at students who wish to focus on both the vocational and the cultivation of an individual interpretation of personal craft practice.

### Foundation Degree in Silversmithing and Jewellery

The 1st year puts into perspective the art of the silversmith and jeweller through the study of the basic skills needed to function as a designer and maker.

The 2nd year provides opportunities to develop an individual and personal specialist approach.

### BA Hons. Silversmithing and Jewellery

The 3rd year provides opportunities to develop and improve a personal specialist approach to craft practice (raising, planishing, box making, making settings and findings, setting stones as well as researching new technologies...).

At the end, there is the opportunity for a final exhibition and

participation in national events such as the New Designers Exhibition at the Business Design Centre, London.

Then students can enter the craft industry or Arts administration.

It is always a priority for Vision numeric that the major actors in the jewellery educational sector could include 3DESIGN in their courses.

The young learners may be the next professionals who will use new productivity-driven technologies to shorten all the processes of creation, communication and machining of their pieces.

Because 3DESIGN is one of the leading CAD/CAM software solutions dedicated to the jewellery world, because it is easy-to-use and powerful with its unique parametric modeller and because Vision numeric cares about raising strong partnership with schools and learning centres... Truro College decided to adopt 3DESIGN in its program and thus to consolidate its vocational education with the latest and world-applied technologies.
